Education

Duke University   2020 - 2024 (Upcoming)

B.S in Computer Science and Mathematics, Philosophy.

Adelphi University   2018 - 2020

Pre-College Program   GPA 4.0

Skills

Languages

HTML, CSS, JavaScript, Java, Python.

Frameworks and Tools

Bootstrap, Bulma, Figma, WordPress, PicoCMS

Professional Experience

Captivect Design   Old Bethpage, NY

Owner   June 2016 - Present

I engage clients, serving as a first line of contact. I meet with them and understand their goals and then draft a project time-line. Next, I create mockups, interactive demos, and stylesheets to help the client realize their vision and enforce consistent branding. I then develop the site using whichever technologies are best suited for the clients needs. I created a subdivision providing web services for free to qualifying non-profits.

Projects

Dormicile   Current

A dorm listing site

Secretary   Current

An AI calendar app that uses your emails to help you plan your day.

Challenger   2018-2019

An MVP for a social network. www.challengemeto.com

I created an MVP for a concept social network "Challenger" using PHP, MySQL, open-source software, and custom scripts. Our site was completely functional: users could share text, video, pictures, earn awards, PM each other, and join groups. Ultimately, while I was able to prototype a social network, the demand was too low for me to consider marketing to usurp the larger players.
